Attn of Group Head of Planning Services.

I object to this planning application on the grounds of the side windows which are a complete intrusion to my privacy.

My party wall surveyor gave me a plan showing the windows as being non-opening, but I have seen them both open. One of the windows that opens is very near to my bedroom window and both windows overlook the patio.

I now understand the building is longer than it should be - hence the need for a planning application. The roof has been a problem from the beginning and is still not completed. This has caused a difficulty to the gutters which previously were connected to mine allowing a clear flow all around the two buildings. However, because of the height of the roof, the gutter to number 119 is now much higher than mine leaving nothing lower down to catch

the water and debris from their gulley - so an upturned bend has been attached to mine and can only go one way and that is back along my gutter causing clogging.

I hope all of this can be taken into consideration as it appears I am the only person it affects and an inspection from my side of the building would be welcome.

Carole Paterson

Owner of 121 Old Manor Road.
