Dear Sir/Madam,

re Application R/239/20/PDM
17, Amberley Road, Rustington, BN 16 2EF.

Thank you for the information regarding the proposed extension of a conservatory at the above address. I have seen the plans.

The property lies directly behind ours & already has a very substantial full width extension which appears to have eaves higher than the original bungalow. I don't know if this is actually the case.

Although I feel I cannot object in principle, the proposed size, & particularly height, of the building does greatly concern me. It would adversely impact on our property, especially as in recent weeks all the previously screening vegetation (cherry trees & camellias) have been removed.

If the roof of the proposed conservatory were to be kept at eaves height, & not the extra 0.92 metres, this would be much more acceptable. It would also be more in keeping with the style of the property.

Please can this be put forward as a condition of granting permission? We request this

[Miss JUNE M MOORS
D M WEST.]
