In reply:

The branches are horizontal to the ground with a slight 5% upward slant, they point SSE (overhang the car park) and the dead branches are brown. The dead branches are approximately from 10 to 15ft up and stem from the middle of the trunk. The trees are all the same height 45 ft approximately. We had them topped out for safety after one (would have been tree 4) was blown down in a storm 2012.
The same PTO was followed then for that procedure.
These dead branches pose a safety hazard to all car park users. They could fall down at any time. They are exposed to high winds from the SW, however they managed to survive two Saturdays ago during that storm. I can photograph them if you require further evidence or, you could visit the site!

Regard
WHMR

Good Afternoon Mr Gough

Thank you for the additional information that I received today.

Please can you confirm from which aspect the branches are to be removed from each tree.

Kind Regards

Nicky Moore

FAO: Nicky Moore,

I have complete section 9 of the application form as instructed and included a more detailed sketch.

I spoke to Ms Grieve in your absence and she advised me to include post codes etc.

I've posted them today directly at the Council centre.

Regards

Eddie Gough (on behalf of Willowhayne Residents).
