

Please treat as a substitute plan

Dear Anita

Further to our conversation of this morning, please find attached a revised drawing showing the reduced height garage. This is now shown lowered to 4.22m (lowered by almost 1m, based on a 25 degree pitch). This reduction has been provided in response to the comments of the occupiers of No.1 Grafton Close. I trust that this is satisfactory, and you can now update the application file accordingly, and supersede the previously submitted elevations drawing. Please can you confirm this has been done and nothing else is required?

I note that you intend to report the application to the District Planning Committee scheduled for 5th February 2020, and that you will be able to provide a substantive update before then around 17th January. I look forward to hearing from you then.

In the meantime I wish you a very merry and relaxing Christmas.

Best regards,
