Dear Nicky,

Initially the tenant wanted up to 4m taken off back to existing pollard points. This was on the eastern side of the tree.

I feel now, however, that the issues I have since explained now supercede this. We employ tree surgeons, in our opinion the bleeding canker and bark separation that has occurred within quite a short space of time would mean that unfortunately the tree needs to be felled. I just wanted to double check if a tree officer needed to inspect the tree.

Kind Regards

Matt

Dear Matt

Thank you for your email and the attached images.

In order for me to validate your application, can you please confirm the limb reduction in metres to 1 No. Horse Chesnut tree, and also confirm if the limb is North, South, East or West facing.

If you have not already done so, you may want to consult a tree surgeon, who will be able to advise you of the best course of action to take.

Kind Regards

Nicky Moore
