Dear Andrew Gale Tree Surgery Ltd

Development:

T1 English oak adjacent to pedestrian access:

- o Shorten the lower lateral spread heading north and north west by 3m

Average current branch length 10.5m

Average finished branch length 7.5m

- o Suitable growth points will dictate the exact line of pruning

- o Lateral prune to union 2-3 drooping branches on the western side of the tree

The northern and northwestern aspect of the tree is beginning to extend towards the neighbouring property; the pruning is intended to abate the spread whilst maintaining the aesthetic nature of the tree
