As a resident of Cheam Road I think I may be speaking on behalf of many in the Cheam and Merton areas of our concern regarding the installation of a controlled gate at the end of Amberley Road It will to some extent create a cul-de- sac in the area frustrating public services and particularly emergency services culminating in the potential for accidents with people turning round etc I really cannot see why it is needed because any traffic entering Amberly at that end cannot speed down that short piece of road before turning into Merton and I have not seen any evidence of anything other than light traffic using it anyway.

If they want speed bumps then fine but a controlled gate seems totally unnecessary and potentially dangerous
