

### **Surface Water Drainage Statement**

#### **Rustington Convalescent Home Summerhouse**

As part of the application for a replacement summerhouse at Rustington Convalescent Home, no alterations are proposed to the existing surface water drainage system.

Given the similarities of the proposal with the form of the existing summerhouse; that the existing and replacement summerhouse are sited in the same location; and that the replacement summerhouse would be surrounded by soft landscaping; we don't envisage that any changes should be required to the surface water drainage system.
