Dear Sir/Madam,

Town & Country Planning Act 1990 (as amended)
Town and Country Planning (Development Management Procedure) (England) Order 2015

Application No: R/37/26/PL
Site Address: Church of St Peter and St Paul The Street Rustington BN16 3NL
Description of works: Installation of photo-voltaic panels on the roof on south aisle and adjacent vestries.
This application affects the setting of a listed building, affects the character and appearance of the Rustington Conservation Area and is in CIL Zone 4 (Zero Rated) as other development.

Thank you for your internet representation made on 16th March 2026 which has been recorded as support with the comments as follows:

OWPC82163

I express my support for this application. This proposal makes great use of a flat roof area, away from any real eyesight, to generate carbon free energy, used in the provision of a public service. The fact that additionally, the church appears to have gone to extensive lengths to find a solution that is not invasive to any physical aspects of the building, and is not interfering with the most sensitive/historic parts of the building also (i.e. they are not on the main church roof!)

By not being visible it clearly does not impact on the "heritage area" within Rustington either.

I understand, like many organisations, (and the UK as a whole are pushing for net zero targets for the future), the Church of England has a net zero by 2030 campaign, and its creative applications like this, that balance future needs alongside protecting our rich heritage, that should be encouraged.

Your views as made above will be considered before the application is determined.
