Dear Michael

I am the agent for the above application.

After discussion with Building Control and the Client it is intended to make a small change to the design in that the roof to the extension to the garage is now shown as going to a full pitched roof rather than the pitched parapet shown on the submitted plans. This increases the overall height of the garage extension by a mere 200mm. However, we believe this is a better, more fluent design for this roof and will be easier on the eye and easier to construct to a good standard of robustness, especially in terms of waterproofing and maintenance.

Please could you substitute these drawings for the proposed drawings submitted.

This is the only change on the attached drawings.

I would appreciate your acknowledgement and comment, if any.

Many thanks

Liz
