Dear Nicola,

Ref R/4/22/DOC

Thank you for your email requesting clarity regarding my earlier request.

May I confirm that I am applying to discharge Condition 3 of R/305/18/L - materials and finishes - joinery (including details of the sealed glazed units) in respect of the 4 replacement windows detailed on the recent request (following approval of the approved plan - replacement window details - 4407/3 November 2018).

An earlier request was considered by the Conservation Officer (26th November 2021) and refused as there was insufficient clarification on the double-glazed units to be used. It was not appreciated by me at the time that further plans needed to be submitted to demonstrate the units would comprise the slimmer design. The drawings now submitted show the slimmer design (12-14mm) with the glazing bars being solid and an integral part of the joinery which is consistent with the current windows to be replaced.

By way of additional clarification, the glass will be fitted externally and putty applied externally around the glazing bars to retain the glass.

There will be no beading applied (internally or externally) to form the glazing bars.

Should you require any further information, please do not hesitate to contact me.

Kind regards,

Andre Scruton
