Response to Planning Application

From: Arun District Council Greenspace
Date: 02 July 2020

Application ref: R/66/20/PL

Description: Residential development consisting of 1No new dwelling. This development is CIL Liable.

Location: Land adjacent to 19 The Bramblings Rustington BN16 2DA

Determining Authority: Arun DC

Summary recommendation: Recommend **no landscape objection** subject to the submission of detailed landscape scheme.

Comments

Relevant landscape designations:

The site is presently adjoining the setting of one domestic dwelling. There are no physical, visual, historical or cultural links, protected landscapes, scheduled ancient monuments, listed buildings, conservation area or Historic Parks or Gardens associated with this site.

Response

The proposed site sits within an already established residential area with established green infrastructure. The effect on street scene would be of minor effect and the incorporation of new planting would go somewhere to mitigate this.

This is a CIL liable site.

There would be no requirement or trigger for the provision of Public Open Space or Play on site with this development, but CIL monies should be sought for recreation and leisure facilities as detailed in our SPD Open Space, Playing Pitches, Indoor and Built Facilities January 2020

The NPPF para 124/127 relate to good design principles. The indicative location plan has suggested the retention of the majority of the existing trees including the TPO'd Pine and inclusion of new landscaping to this development would be required to be submitted and approved. The inclusion on new landscaping for these proposals should be in consideration of greening and screening and should also consider the biodiversity net gain to be achieved with this development.

Impact

The potential impact of the proposals could be blended into the surrounding environment with further thought given to the landscape offer and greening to counteract this.

Mitigation/requirements

No landscape detail has been shown for this development at present. A landscape scheme in plan form would be required to show retained trees and shrubs with proposed plant species detailed along with planting quantities, densities and size at time of planting. All areas should be considered and their connection for biodiversity and habitat explored. All planting specified should be at a suitable size which allow instant impact, but which will establish and mature as the site develops.

Recommendation/Conclusion

I would recommend **no landscape objection** subject to the submission of a detailed landscape scheme to be submitted for approval. Landscape detail to be submitted in plan form to show existing to be retained and new planting detailing species choice, actual quantities, planting densities and size at time of planting.
