Hi,

I am a garage owner at the rear of the proposed properties and I would like to know how the developers are proposing to get their materials to the site.

I have been speaking with some of the other garage owners today and apparently there has already been some investigating been done by the developers in the way of them using our privately owned access to our garage to get to the rear of the proposed properties with their heavy goods vehicles to be delivering materials etc. The garage access way is already in poor condition and would not be able to withstand heavy goods vehicles etc and would therefore cause more damage to the road. Access to our garages would also be blocked off. Also, what happens if they tell you that they are not going to be doing this and they do. What do we do about it?

If they are going to be doing this then I fully object.

Regards
Vicki Henning
