ELEVATION (A) OF AUTOMATION WALL
& GALLERY WALL

Note: CEILING HEIGHT in main
banking hall must be checked on site.

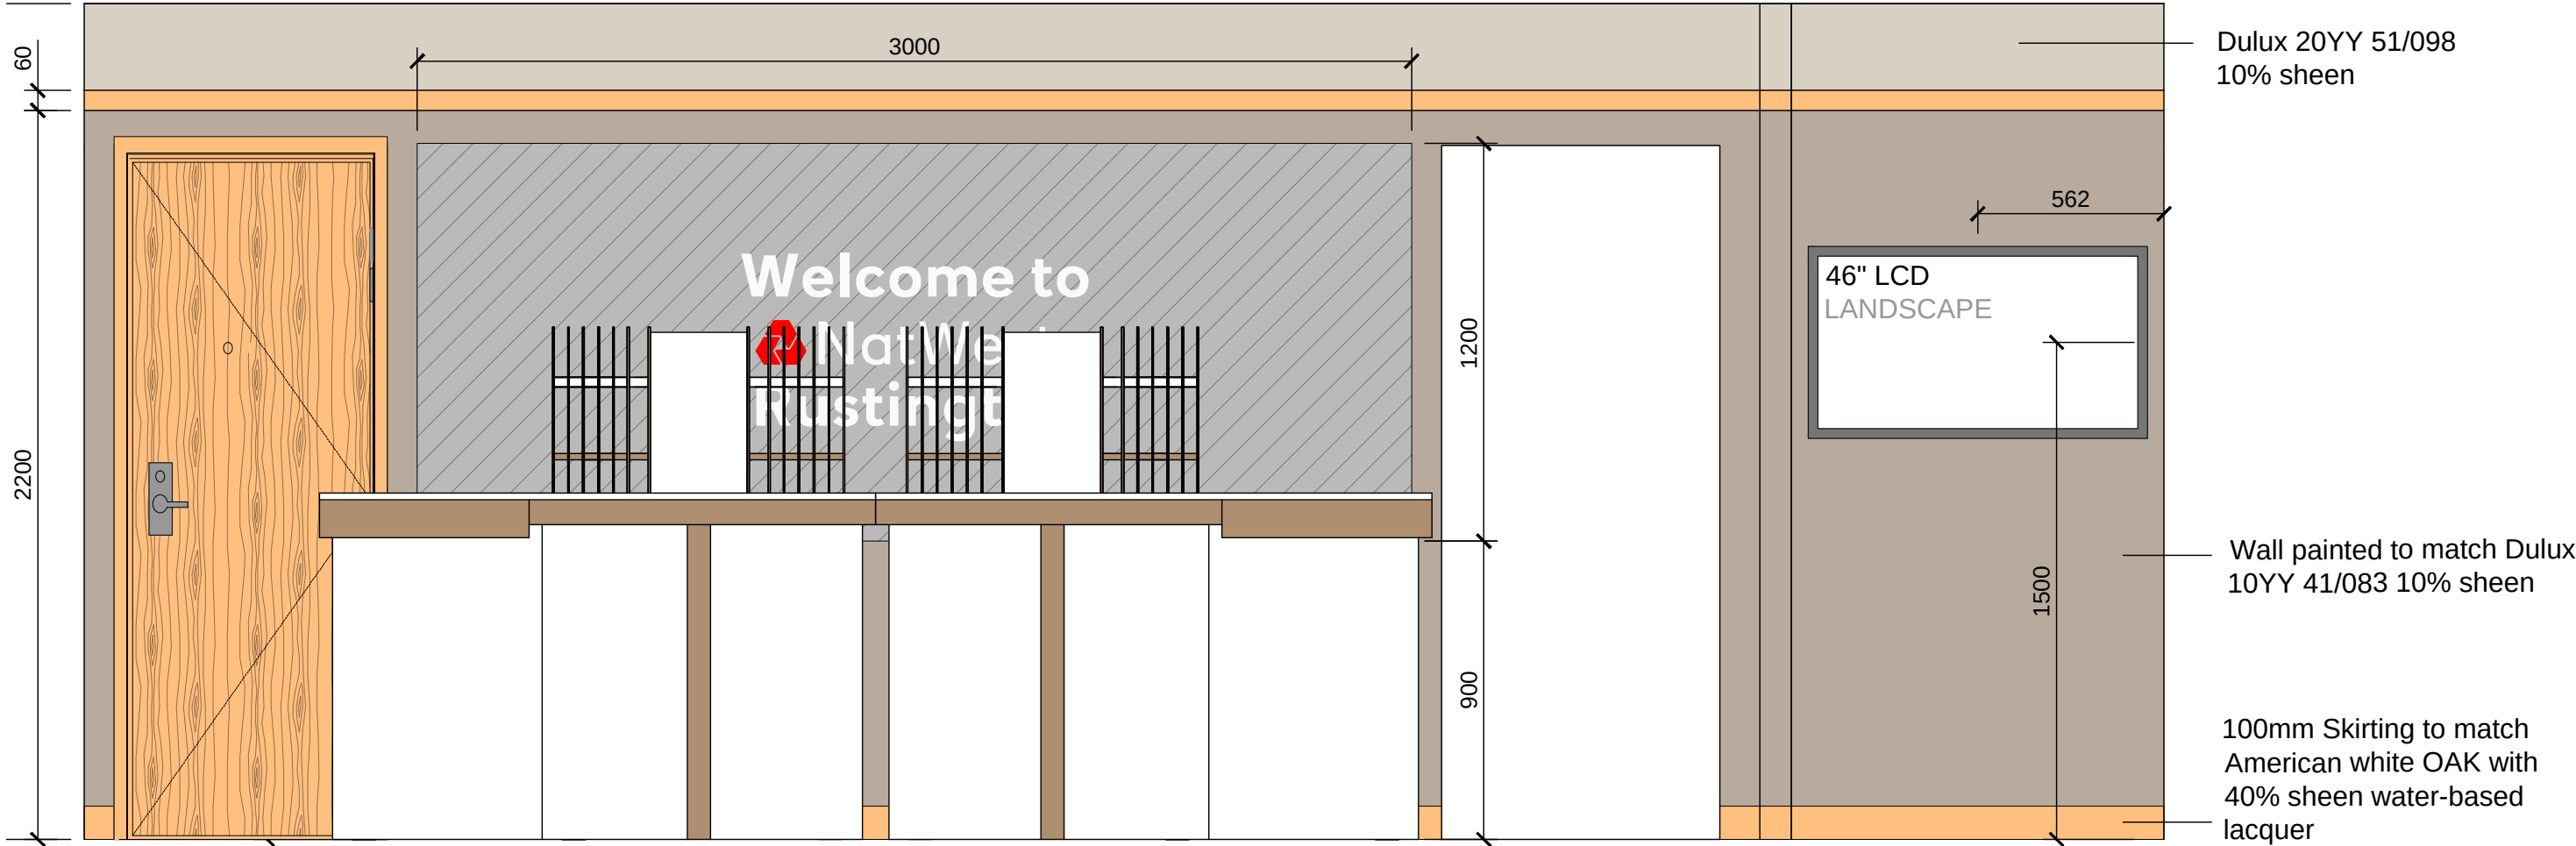

Content of machine chevron is indicative
only.

Imagery for Automated Wall to be agreed
(unique to each branch)

Automation wall graphic
- Local or regional graphic with automation signage printed on.
- Walls to be battened whenever possible and panelled with 12mm / 18mm or thicker smooth melamine faced boards. Boards should be a minimum width of 1200mm where possible. Having fewer board joins in the finished wall will give a greater quality end finish.
- All boards must be plumb and square with no ridges or gaps between adjacent boards. Boards should be routed and biscuit joined along the longitudinal edges. This should ensure that there is no future movement between adjacent panels.
NOTE: *JOINT QUALITY IS CRITICAL*. Horizontal joins should be avoided where possible.
- All joins to be smooth and flat, board fixings to be countersunk, filled with a two-pack filler and sanded down to a smooth finish, prior to application of Lamigraf.
- Sufficient quantity of fixings to be used to ensure board stability over a period of 5 years.
- Dimensions to be confirmed on site after installation of automations.
- Top of graphic to be finished with 32 x 25mm MDF trim finished Satin paint Dulux 20YY 43/083 (Dark Taupe).

WELCOME GRAPHIC 3000mm WALL

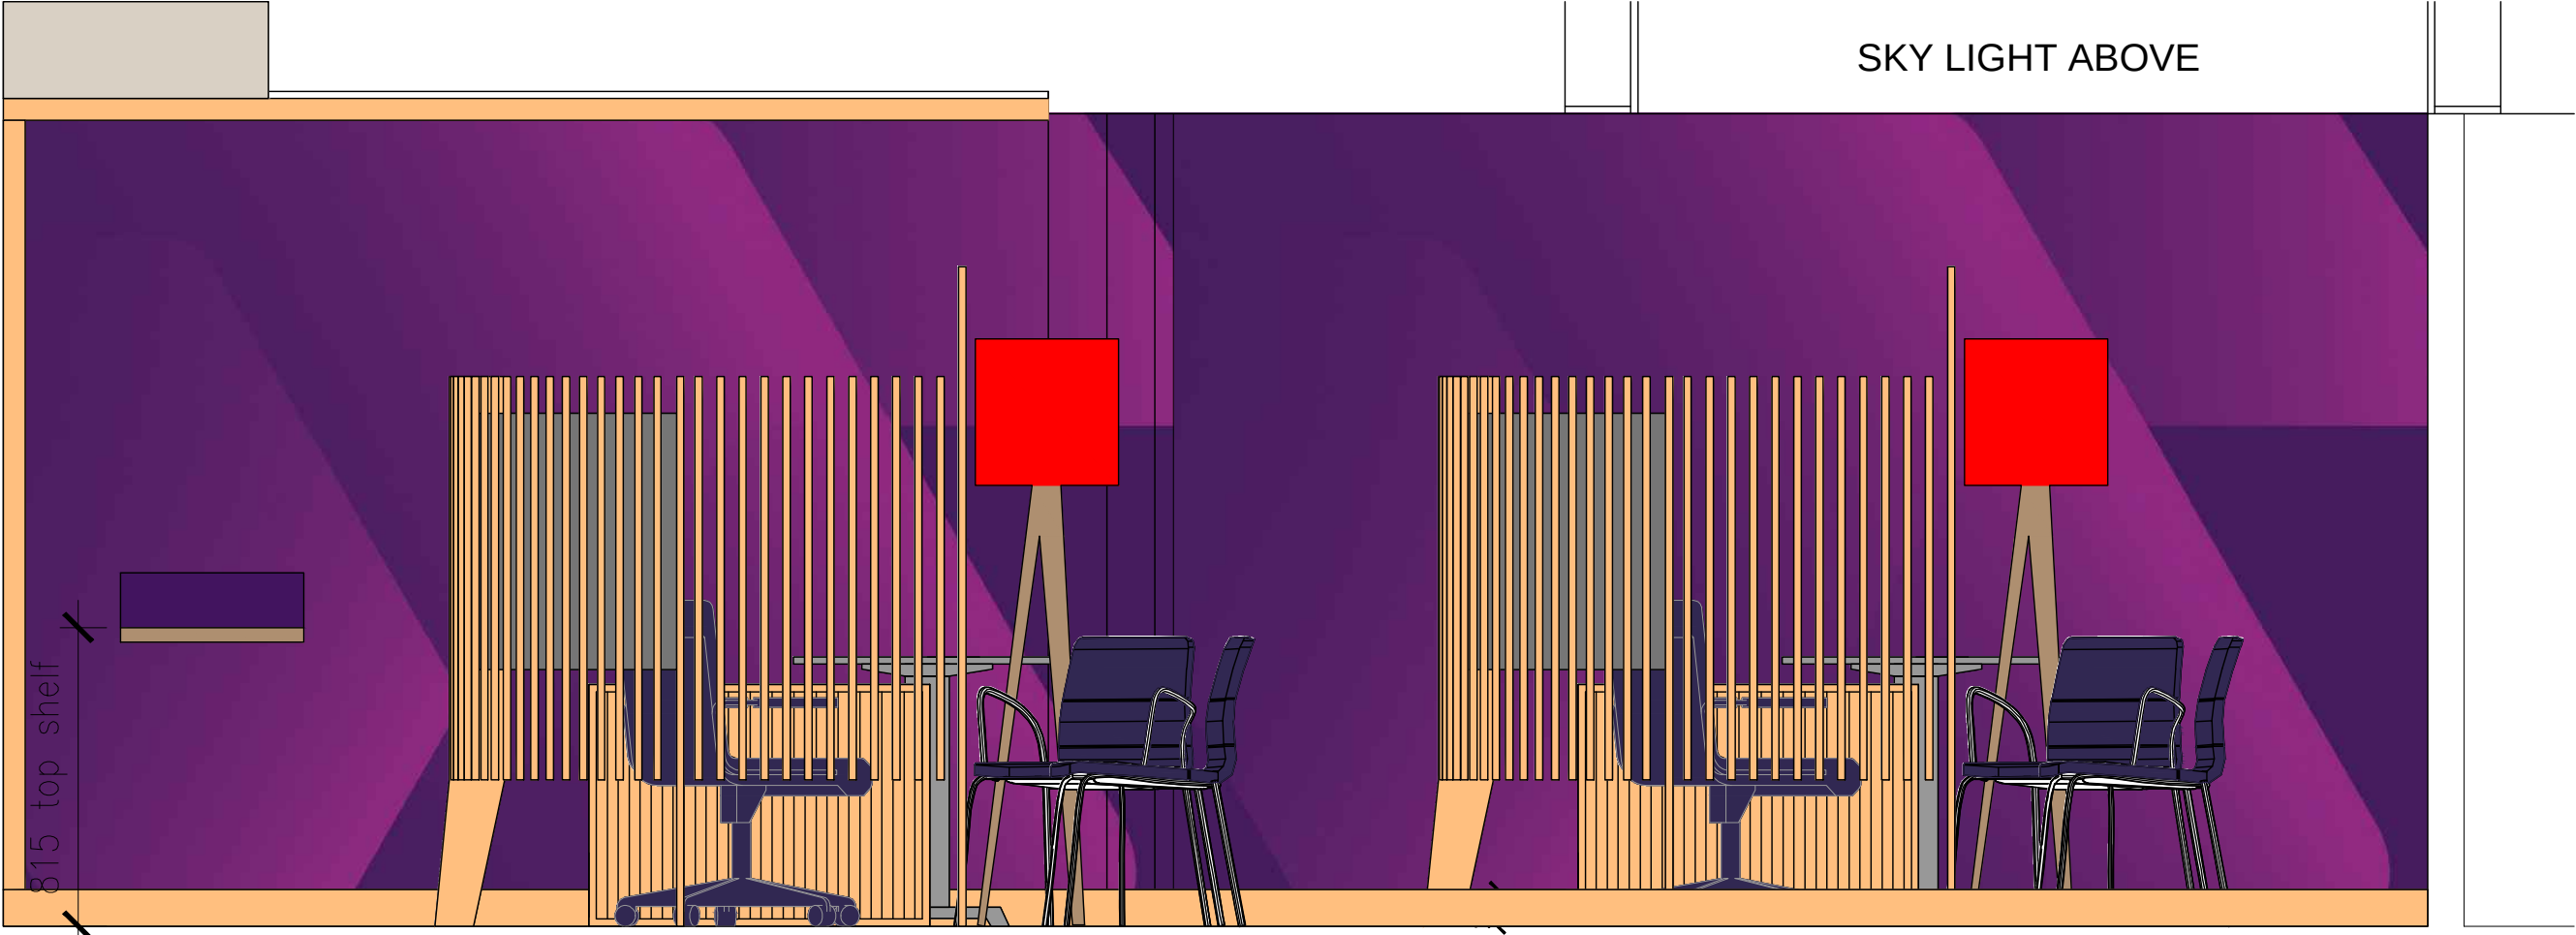

ELEVATION (B) OF WELCOME WALL
