Subject: Planning Permission

Dear Sirs

Re: Permission for Solar Panel Installation

We are Solar Energy Company writing on behalf of Mr & Mrs Mounstephen, of **Wootton House, School Hill, Slindon, Arundel, West Sussex, BN18 0RS**. The above Property is in a special area of conservation; our installation for the above customer is within permitted development. This complies with the conditions of the offer of the government grant for solar installations, which many of our customers rely on to make the installation affordable. Under the new legislation regarding solar panels being within permitted development, we can confirm that:

- The panels will not protrude more than 200mm from the surface of the roof.
- The panels are not placed higher than the ridge, or highest part of the roof.
- The above Property is not a listed Building.
- The customer is having 8 Panels

The panels are: SCHOTT ASE -165- GT- FT/MC

Dimensions are: 1620 x 810 x 50mm

Do we need Planning permission to install solar panels on the roof of this property?

Regards,

Sarah
