Dear Mr Dudley,

Thanks.

Sorry one more. This was requested from Southern water. If we get comments back from ADC Drainage and they request conditions, these would likely replace it however I would get your agreement for any amendments.

'Construction of the development shall not commence until details of the proposed means of foul sewerage and surface water drainage have been submitted to and approved in writing by the Local Planning Authority in consultation with southern water.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with Arun Local Plan policies W SP1, W DM1, W DM2 and W DM3. This is required to be a pre-commencement condition because it is necessary to implement the foul and surface water drainage system prior to occupation of the building.'

Thanks

Amber Willard MRTPI

Sub:

Dear Mr Dudley,

Thanks for the below. I have uploaded and re-consulted the drainage team.

There are a few pre commencement conditions that have been requested and would require agreement. I copy them below.

1. 'No development shall take place until a Reptile Mitigation Strategy addressing the mitigation and translocation of reptiles has been submitted to and approved in writing by the Local Planning Authority.

The Reptile Mitigation Strategy shall include the following:

1. Purpose and conservation objectives for the proposed works.
2. Review of site potential and constraints.
3. Detailed design(s) and/or working method(s) to achieve stated objectives.
4. Extent and location/area of proposed works on appropriate scale maps and plans.
5. Type and source of materials to be used where appropriate, e.g., native species of local provenance.
6. Timetable for implementation demonstrating that works are aligned with the proposed phasing of development.

7. Persons responsible for implementing the works.
8. Details of initial aftercare and long-term maintenance of the Receptor area(s).
9. Details for monitoring and remedial measures.
10. Details for disposal of any wastes arising from works.

The Reptile Mitigation Strategy shall be implemented in accordance with the approved details and all features shall be retained in that manner thereafter.

Reason: To allow the Local Planning Authority to discharge its duties under the Wildlife & Countryside Act 1981 (as amended), s40 of the Natural Environment and Rural Communities Act 2006 (Priority habitats & species), and Arun Local Plan policy ENV DM5. This is required to be a pre-commencement condition as otherwise there would be a risk of harm to protected species and their habitat.'

2. No development shall take place, (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), until a construction environmental management plan (CEMP: Biodiversity) has been submitted to and approved in writing by the Local Planning Authority.

The CEMP (Biodiversity) shall include the following.

1. Risk assessment of construction activities potentially damaging to biodiversity.
2. Identification of "biodiversity protection zones".
3. Practical measures (both physical measures and sensitive working practices) to avoid or reduce ecological impacts during construction (may be provided as a set of method statements).
4. The location and timing of sensitive works to avoid harm to biodiversity features.
5. The times during construction when specialist ecologists need to be present on site to oversee works.
6. Responsible persons and lines of communication.
7. The role and responsibilities on site of an ecological clerk of works (ECoW) or similarly competent person.
8. Use of protective fences, exclusion barriers and warning signs.
9. Containment, control, and removal of any invasive non-native species present on site.

The approved CEMP (Biodiversity) shall be adhered to and implemented throughout the construction period strictly in accordance with the approved details, unless otherwise agreed in writing by the Local Planning Authority.

Reason: To conserve protected and Priority species and allow the Local Planning Authority to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended), s40 of the Natural Environment and Rural Communities Act 2006 (Priority habitats & species), and Arun Local Plan policy ENV DM5. This is required to be a pre-commencement condition as otherwise there would be a risk of harm to protected species and their habitat.

3. No development/demolition/levels changes (apart from any survey works required by other conditions) shall take place and no machinery shall be introduced to the site, unless and until written confirmation supported by photographic evidence is provided from the Arboricultural Expert representing the site owner(s) to demonstrate that all protective fencing and ground protection has been inspected and found to be 'Fit for Purpose' as required under British Standard 5837:2012 and has been erected and positioned exactly as shown on the Tree Protection Plan within the 'Arboricultural Implications Assessment and Method Statement -231579 AIA 3.'

Reasons: To comply with BS5837:2012 and ensure the retention and maintenance of trees and vegetation which are an important feature of the area, in accordance with Arun Local Plan policies D DM1 and ENV DM4. It is necessary for this to be a pre-commencement condition as the protection and retention of trees goes to the heart of the planning permission.

4. The effect of paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990 is that planning permission granted for the development of land in England is deemed to have been granted subject to the condition (the biodiversity gain condition) that development may not begin unless:

1. A Biodiversity Gain Plan has been submitted to the planning authority, and
2. The planning authority has approved the plan.

This permission will require the submission and approval of a Biodiversity Gain Plan before development is begun.

For guidance on the contents of the Biodiversity Gain Plan that must be submitted and agreed by the Council prior to the commencement of the consented development please see the link:

<https://www.gov.uk/guidance/submit-a-biodiversity-gain-plan>

Reason: To ensure the development delivers a biodiversity net gain on site in accordance with Schedule 7A of the Town and Country Planning Act 1990 (as amended).

Please let me know if you agree.

Thanks
