Discharge of Condition No 13: Gates, walls and piers

Date 6th December 2018

Information to support Condition No 13

- The gates/panels on site will be removed to refurbish/repair them to return them back to their original condition and locations (see drawing No 1)

We propose to abrasive blast prior to repairs, re-blast after repairs to re-establish ISO8501-1 grade Sa2.5 minimum, paint with two-pack epoxy zinc phosphate primer, paint with two-pack epoxy undercoat and paint with two-pack epoxy acrylic or two-pack polysiloxane finish black RAL9005 gloss. (note: we will not powder coat the metalwork)

- The pillars require repairs and we are mindful that you would like to retain the American graffiti put there during the Second World War. We will attempt to retain as much of this as possible, but there may be instances that this is not possible. In this case we would contact you for your comments. We intend to carry out the following-

To hand takedown damaged pier to a solid point and keep as much of the existing pier that is structurally solid.

We will supply all missing/broken bricks, approx. 1m² of cobbled flint approx. 75mm-100mm in size together with handmade flint galletts

We will rebuild approx. 2m² of cobbled flint work with a recessed brushed finish and place all galletts in to the mortar at the rebuild stage

We will rebuild 1x brick pier, repointing any additional areas of missing or loose mortar, all to match existing. Mortar mix used will be a traditional heritage mix consisting of 3.5nhl lime sharp sand and a heath silver sand

- The piers have pillar caps sat on them which are a total state of disrepair. These will be replaced as repairs would be unviable. They will match the original style and size and colour of the original (See Drawing No 2)
