Planning Ref	WA/109/24/OUT
Site Description	Sussex Business Village Lake Lane Barnham West Sussex
Date of Application	2025-03-19 00:00:00
Category	Outline Planning Permission
Recommendation	No Objection No Objection – with conditions Objection Holding Objection

EH Comments:

I have reviewed the above application, and I have several concerns due to the location in relation to existing and historical commercial uses.

If planning consent is to be granted, I would recommend the following conditions.

Conditions Recommended:

PCENV3 : Full PCL condition

Requires EA input to discharge re. protection of the environment aspect

Prior to commencement of the development hereby approved, or such other date or stage in development as may be agreed in writing with the Local Planning Authority, the following components of a scheme to deal with the risks associated with contamination of the site shall be submitted to and approved in writing by the Local Planning Authority:

1. a preliminary risk assessment which has identified all previous uses,

potential contaminants associated with those uses, a conceptual site model and potentially unacceptable risks arising from contamination at the site.

2. a site investigation scheme, based on (1) to provide information for a detailed risk assessment of all receptors that may be affected, including those off site.

3. based on (2), an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken. The remediation strategy shall include details of the data that will be collected in order to demonstrate that the proposed remedial works are complete and identify any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

4. a verification report demonstrating completion of the works set out in the approved submission (3) and the effectiveness of the remediation. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met. Where necessary, the report shall also include long-term monitoring and maintenance plans and arrangements for contingency action.

Note:

Any changes to these components require the express written consent of the Local Planning Authority.

Reason:

To ensure that the development complies with approved details in the interests of protection of the environment and prevention of harm to human health in accordance with the Arun Local Plan policies QE SP1 and QE DM4. This is required to be a pre-commencement condition because these details have to be agreed and in place before any work commences.

PCEHN2 : Noise-sensitive development near existing noise source

Construction work shall not begin until a scheme for protecting the proposed residential dwellings from noise from the nearby industrial/commercial units has been submitted to and approved in writing by the Local Planning Authority. All such works which form part of the scheme shall be completed before any part of the proposed development is occupied.

Reason: To safeguard the amenity of residents in accordance with Arun Local Plan policy QE DM1. This must be a pre-commencement condition because it is necessary to have such mitigation measures in place before the buildings are occupied.

LIGHT01 : Lighting scheme

combined EH and Ecology

Prior to the occupation of any part of the development, full details of all new external lighting, including type of light appliance, the height and position of fitting, predicted illumination levels and light spillage, shall be submitted to and approved in writing by the Local Planning Authority. The scheme should seek to conform with the recommendations of the Institute of Lighting Professionals (ILP) 'Guidance Notes for the Reduction of Obtrusive Light' (GN01:2011) and:

a)

identify those areas/features on site that are particularly sensitive for bats and that are likely to cause disturbance in or around their breeding sites and resting places or along important routes used to access key areas of their territory, for example, for foraging

b)

show how and where external lighting will be installed through provision of appropriate lighting contour plans and technical specifications so that it can be clearly demonstrated that areas to be lit will not disturb or prevent the above species using their territory or having access to their breeding sites and resting places.

All external lighting shall be installed in accordance with the specifications and locations set out in the scheme and maintained thereafter in accordance with the scheme. Under no circumstances should any other external lighting be installed without prior written consent from the Local Planning Authority.

Reason:

In the interests of the amenities of the area, the site's biodiversity (particularly in respect of bats), the interests of minimising crime, the interests of road safety and to minimise unnecessary light spillage outside the development site in accordance with Arun Local Plan policies QE SP1, QE DM2, T SP1 and ENV DM5.

EHN23 : Building services plant (BS4142:2014+A1:2019) EH - see notes

No externally located plant, machinery equipment, including air source heat pumps shall be operated on the site until an assessment of the acoustic impact arising from the operation of all such equipment has been submitted to and approved in writing by the Local Planning Authority. The assessment shall be undertaken in accordance with BS 4142:2014+A1:2019 and shall include a scheme of attenuation measures to mitigate the adverse impacts identified in the acoustic assessment. The scheme shall ensure that the rating level of noise emitted from the proposed building services plant is 5 dB less than the prevailing background sound level (LA90). The scheme as approved by the Local Planning Authority shall be fully installed prior to first operation of the plant and shall be retained as such thereafter. Any agreed attenuation measures shall be permanently maintained in good working condition. The applicant should review the Planning Noise Advice Document – Sussex, November 2023:
<https://www.arun.gov.uk/download.cfm?doc=docm93jijm4n19846.pdf&ver=24686>.

Reason:

To protect the amenity of local residents in accordance with the Arun Local Plan policy QE DM1.
