Andrew,

Further to our previous emails.

Your current drawing, submitted to ADC, shows your proposed connection being made into the existing road gully connection, this is not what was shown on your original drawing.

Your connection should be made direct into the gully, which should be reconstructed as a new catchpit gully to accept the connection.

For your information, I have attached details that show our standard detail for a catchpit gully (Type RG2, WSCC-SD1-0500-025).

Regards,

Kevin

Andrew,

I'm happy with your current proposals. As surface water currently runs off the existing driveway, I'm happy with the proposed connection into the existing highway system.

Regards,

Kevin

****EXTERNAL****

Kevin,

Re - Snetterton, West Walberton Lane, Walberton, West Sussex. BN18 0QS

As suggested, the scheme is now updated to include a gully at the base of the driveway, to prevent / reduce surface water from the drive onto West Walberton Lane.

If you have any additional comments please let me know, otherwise I will present and confirm these details with Arun planning department.

Thank you for your continued advice and assistance, all of which has been very much appreciated.

Kind regards

Andrew Hinton BA (Hons) Architectural Consultant
