OWPC75741

Lake Lane (the road) is built on shifting sands. In the past 6 and a half years that I have lived here, the road has been closed numerous times due to collapsing sewers or sink holes. Heavy goods vehicles accessing the proposed site will only exacerbate this further.

Lake Lane experiences frequent flooding with houses and land being affected. The land proposed for development is lower lying so is surely at risk of flooding. The water service infrastructure is not capable of taking further load. The wet winter prior to this saw water tankers removing excess water pretty much constantly for approximately 6 months, causing disruption to residents with temporary traffic lights, noise and additional load on the roads causing further subsidence issues. Further development will only add to this.

Access from the proposed development will also cause issues.

Your views as made above will be considered before the application is determined.
