Dear Mr and Mrs Rogers

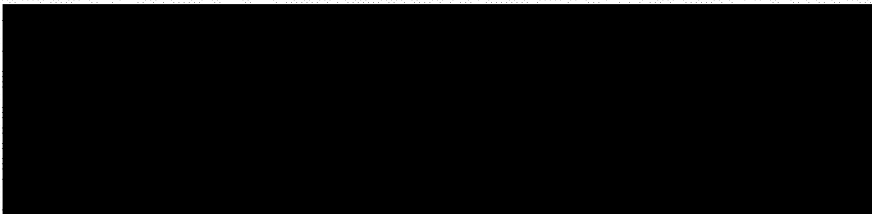

Report on The Mature Goat Willow situated just west of your front boundary fence.

Further to my visit to look at the tree, I confirm the following

For a Goat Willow, this is an exceptionally large specimen. It is a tree dominating both, yours and your neighbours front gardens. I understand the need to control this tree, due to the following reasons. It is situated directly south shading out both front gardens, has phone lines running through it and is within influence of the highway.

I recommend the following works to this tree – To alleviate the various issues, I recommend a canopy thin of 15% and crown lift over the Street, leaving highways clearance of 5.5 Meters

If you require more details they will gladly be provided.

John Bentley NDArb
