DRAGONFLY PADDOCK, EASTERGATE LANE, WALBERTON.
RETENTION OF MOBILE HOME

FOUL DRAINAGE AND UTILITIES ASSESSMENT

Foul Drainage

Consideration has been given to the disposal of foul sewage due to the lack of any mains drainage system in the vicinity of the caravan.

In this respect, and taking into account the advice contained within circular 03/99 I can confirm that non mains sewerage for the caravan will be disposed of to its own Biotec Sewage Treatment Plant.

The proposed system would be approved by the Environment Agency, including the point of discharge.

Utilities

Electric exists on site and a connection has been made.

Heating and cooking for the mobile home are provided by way of bottled gas.

Mains water exists on site.
