Arboricultural Implications

Reference: Zoe Shore, 18 Hunters Mews.

T1 Ash. This tree is positioned within the rear garden within 3 metres from the property and is visible from the road, village and approximately 6 metres from the neighbouring property and potentially has a higher visual value.

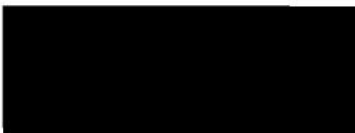

The tree has had historic sympathetic crown reduction over time to maintain the tree at a reasonable size. There is exposed decay in the upper stem and major limb. The decay in this time has noticeably increased

The tree has limited potential with the level of decay present and given the proximity to the property and potential risk of failure we would like to remove the tree and replant if necessary.

.

Please see attached photos below for reference.

Yours sincerely

Daniel Barker
