

Midwood, West Walberton Lane, Walberton. BN18 0QS

Flood Risk

The proposed site falls within Flood Zone 1, therefore is outside of any identified flood risk area noted on the Environment Agency Flood maps.

Drainage

The site falls within the Lidsey Foul Water Treatment Catchment Area.

The surface water generated from the new roof will be disposed of on-site via soakaways. The current foul drainage is disposed of via a mains sewer, and it is proposed to use this existing connection and make no further changes.
