Hi Gen,

Following your consultation response on WA/31/22/DOC I have been in touch with the agent who has provided the below comments. Are you able to let me know if this addresses your original concerns in relation to the absence of shielding.

Many thanks,
David

Morning David

Following your email below, we have checked with the designers and they have confirmed that the shields are not required as these are downward directional lights and the upward lux spill is 0. Please see attached updated specification drawing which shows 0 lux spill and therefore no need for the shields to be attached.

I hope this assists.

Kind regards,
Peter

Hi Peter,

Apologies for my absence last night I had my days wrong, but hope it went well. Things are a tad busy here as I am sure you can imagine.

In regards to the below we have received a consultation response from our ecologists who have advised that subject to shields being secured for the proposed floodlighting they have recommended the discharge of Condition 9. I have looked at the proposed floodlighting plan and can see no reference within the notes to shields being installed are you able to confirm and amend if necessary to address this?

Many thanks,
David

Dear David

Hope all is well.

Please could I request a quick update on the above DOC. This relates to the lighting detail for the Dandara scheme at Fontwell.

Kind regards,
Peter
