re: Planning Application
WA 3415 PL.

- 1 I strongly object to solar panels being installed at Lower Farm Yapton Lane Walberton.
The land is Grade I farm land with a cereal crop yield of between 5-6 tonnes per acre, the yield therefor is higher than that achieved on the comparison areas around Grundle.
- 2 The land must surely be kept for food production & protected from other uses.
- 3 We have lost many acres of farm land around the five villages it is constantly under pressure from developers or energy giants.
