PLANNING APPLICATION WA/38/09 & WA/49/08

Clarification of recent memo.

The Sweet Chestnuts which were referred to in July 08 are still the ones referred to in 09. At the first take we were not using "Tempo". On the second take we are using Tempo, and the trees come out with a low score. You may recall our meeting with Zach when we felt that the tree (even the sweet Chestnut near the entrance) were of a low score.

With regard to the Oak Tree situated on the frontage, Zac was not too enamoured by this one, but I have considered that it is worthy of retention, and a TPO, though it is on land believe to be WSCC...

We need to request data to identify how they will protect the tree during construction.

Mark
