Proposed Pool House to replace existing structure : Biodiversity Enhancement

### **PROPOSED ENHANCEMENT**

The area to be covered by the proposed building is currently a cultivated garden area, mainly grassed but with an edging of rosemary

A new hedge forming a suitable habitat for small birds will be planted, comprising 150 privet saplings with an overall length of about 30 metres.

Other habitat enhancement including 50 Silver birch saplings and 250 mixed hedging plants is also being implemented around the garden and adjoining land as an improvement to the plot when compared to when the applicants acquired it.
