Dear Jo

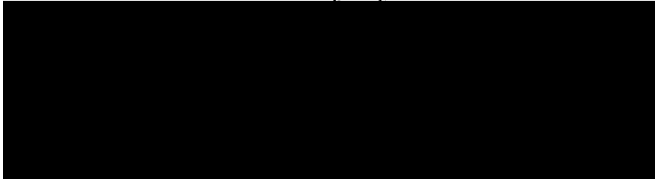

Thank you for getting me over to take a look at your Eucalyptus tree.

I can confirm that this tree has still not reached maturity and although a good height at approximately 12 meters, will double in size over the next 10 to 15 years.

It is not unreasonable to ask for the tree to be managed due to it being on your southerly boundary. I recommend the height is reduced by 5 meters leaving it at a final height of around 7 meters. This tree can then be managed/pruned in the coming years, at a size more suitable for your courtyard style garden.

If I can be of further help please do get in touch.

Yours sincerely

John Bentley (NDarb)
