Application No: WA/42/22/PL

I agree with the conclusions of the Archaeological Desk Based Assessment regarding the potential impact of this proposal on deposits of interest. I also agree that this would be best mitigated through a programme of archaeological investigation and recording, and that this should be secured via the imposition of a standard condition (i.e. a suitable version of ARC1).

The aim would be to secure a suitable investigation, and this might take the form of a watching brief on all significant ground-works or an initial investigation by trial trenching followed by targeted investigation thereafter as appropriate.
