Subject: Tupperts Field, Walberton

For the attention of Michael Eastham.

As a resident of Walberton for the past 25 years, I would like to put forward my objections to the development of Tupperts Field.

This development is outside our Neighbourhood Plan and the Local Plan. I accept that we have to build more houses in the area and have made our offer for small sustainable developments within the community. Walberton is a rural village but it is becoming increasingly threatened by Government decisions which do not take into effect the location and the spirit of a village. We have no doctor's surgery, one small local shop and our Post Office is under threat. The Infant and Junior school is oversubscribed The main Street is becoming more and more dangerous with the recent increase in heavy duty artic lorries using it as a short cut to the A27 and this proposed development in Tupperts Field leading onto Yapton Lane would only make the situation worse. Historically Walberton has suffered major flooding and concreting over even more green space could be a serious threat as well as putting even more pressure on our very ancient sewage system.

We have to accept development on Fontwell Meadows together with other small developments, but this increase in the population, I feel to be totally unsustainable and ask for consideration in upholding our generous Neighbourhood Plan and allowing Tupperts Field to remain a valuable green space.
