Subject: Tuppers Field. fao Michael Eastham

I wish to lodge my strong objections to the proposed development of Tuppers Field for housing:

There would be far too many houses in one area which will completely alter the character of the village. The flow of traffic through the village is already too high and quite dangerous. The narrow street cannot cope as it is currently.

There would be too much strain on the GP surgeries and the local school. There are bound to be flooding risks to the local area.

The loss of green space would also be detrimental to the village environment and would do irreparable harm to the hotel and golf course, which are also major employers in the village.

I cannot understand why this is now being considered as it does not follow the Neighbourhood Plan and is contrary to national guidelines. The Arun District full Council backed the WPC petition as not being suitable and all past assessments said the same. It was also voted the most unpopular proposal in the parish survey.

I do hope that sense will prevail. There are other smaller sites in the local area which would not have such a huge impact on our lovely village for many years to come.
