Subject: Tupperts Field planning application. WA/44/17/OUT

I wish to object to the proposed development at Tupperts Field. I live in Walberton village at 4, Orchard Terrace. There is no doubt that a development of this magnitude would change the essential rural nature of the villages forever. Heavy traffic is already a major problem with the 7.5 ton weight limit being regularly ignored and a significant "rat-run" now seems to be the norm. There are serious congestion issues in The Street with buses and heavy vehicles regularly having to run along the narrow pavement. The safety issues are apparent and any significant increase in population as proposed in this application could only make this worse.

Traffic and congestion is a major issue but there are many others including

- Loss of green space

- Too many houses in one place, better they should be spread across a wider area.

- Reduced separation between the villages.

ADC's consultants indicated there was little scope for accommodation growth without impacting the quality and sensitivity of the Walberton village Conservation area.

Yours faithfully

Lesley Bryant (Mrs)
