Subject: Tuppens field

dear sir please find my stong objection to planning at tuppens field , the planning along this are is in no way in keeping with the village , their are no amenities no roads able to carry any more traffic , in fact i find it quite dangerous now as with the amount of traffic cutting through Walberton Lane Eastergate Lane walberton village and Barnham Lane , i am a resident on Wandley's Lane and i find it incredible that you even would contemplate building in these areas , considering the highways and byways have even said the A27 is at its capacity and heading for a real problem also ydsy treatment also to capacity, please explain where you are going to find the room in these small villages to put in all the amenities needed , sense and sensibility has gone out the window , you should come and live down these lanes and watch the idiots that have decided they are good race tracks in the morning and evenings i chose to live in a quiet are as i had previously lived beside the A27 and watched many accidents and many road blocks and not being able to get out of my house in the mornings, due to the fact the council cant even get the bypass finished , so i moved to the stunning location of Wandley's Lane , which is now also under threat, .where do the councils and planner get these mad hair brained schemes from their is plenty of derelict land that can be used, it is disgusting that farm /green field land is even allowed to be on the agenda, these tiny villages need to stay this way they are the last of them in the area and should be protected not decimated by disgusting plans kindest regards M M Burton and M M Beeney Holly Tree House Wandleys Lane Walberton'
