Attention Michael Eastham

Dear sir

Further to our objections to this development I object yet again as this development is not on the Neighbourhood plan which as a village we have formulated with great care. It is far too many houses in one area and would swamp the village which already has traffic problems in The Street.

the drains overflow from time to time and nothing has been done to improve drainage - flooding has occurred outside my house several times in the past. The traffic noise would aggravate many of the houses near the road and trying to keep traffic flowing would be difficult as there is parking in The Street already so there is often only one traffic lane in use.

Most importantly it has already been agreed that this field is not suitable for development. It would be going against professional advice.

May I strongly urge Arun district council to take a firm line against all the developers who seem to be lined up to try to persuade them to develop more and more of our area. So much of the south coast in the Bognor, Felpham and Rustington area has been utterly over developed. Please help us to keep a few villages as villages and not one great big sprawl.

Yours faithfully

Ridley and Janette Hall
