Dear Planning,

Please could the applicant indicate where the cooling equipment for the freezers and chillers in the retail space will be located as this has not been specified on the plan? Similar for any air conditioning units for the retail space. My concerns relate to the potential noise impact on the proposed residential units above.

I have requested that Private Sector Housing comment back to me on the size of one of the windows in the flats as it appears very small. I will forward their response when I receive it.

Depending on the information provided from the applicant in relation to the first point, Environmental Health would be minded to be satisfied with the application, but put on noise conditions to protect the flats above from potential noise from the retail space.

Regards

Fiona
