Subject: RE: WA/58/20/DOC - Condition 8 Electric Vehicle Charging Points

Andrew,

Please find attached updated drawing, now with the following note;

Socket for the provision of electric car charging.

sockets to be wired with 10mm twin & earth supply cable direct and including 40amp circuit breaker from the consumer unit to the position as indicated on the drawings.
This installation is to ensure that the occupants can install their own 32amp single car charging point or double if they wish at a later date using this pre-wired installation and appropriate circuit breaker.

This is a specification we have used on other recent projects and allows a degree of flexibility to occupiers whilst ensuring the infrastructure is in place to allow for the increased demand of a charging point.

I trust this is adequate, should you require any further detail please let me know.

Kind regards,
Ian

WA/58/20/DOC - Condition 8 Electric Vehicle Charging Points

Ian,
I am not quite sure where you are up to. You may wish to withdraw this application. If not we need actual details of the EV charge points.

Thanks,
Andrew Wood
