

Application No: WA/62/20/PL

I agree with the conclusions reached in the Archaeological Desk-Based Assessment for this site, i.e. that its potential to contain deposits of interest would justify an investigation in advance of development and that this would be most appropriately secured via a suitable standard condition. I therefore recommend that a version of ARC1 as follows be imposed:

No development shall take place until the applicant has secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted by the applicant and approved by the Planning Authority.

The purpose would be to identify deposits meriting preservation through further investigation, recording and dissemination of the results, and evaluation should include that of both the later prehistoric and later potential and the older, palaeographic deposits.
