

Tye Lane

04 August 2021
21:20

Dear Sir/Madam,

My wife and I would like to register our objection to the proposed road from the housing development into Tye Lane for the following reasons;

- Tye Lane is a narrow road and in our experience (as vehicles have increased in size whilst the Lane has not) meeting oncoming traffic can be a problem and any increase in traffic will increase the risk.
- The Street in Walberton can be difficult to safely negotiate due to the way it bends and that cars are parked along the road, making it narrow with semi blind corners, any extra traffic will therefore increase the risk of a collision/accident.
- We understand the application is due to the uncertainty regarding the grey route, surely the application is therefore premature, as the final decision on that has not yet been made (and hopefully Grey will not go ahead).
- We believe that the inevitable increase in traffic will increase pollution in the area, at a time when more than ever this needs to be reduced and that any future planning should be looking at ways of reducing vehicle usage and not promoting it.
