Dear Daun,

Please find our floor plans and elevations.

The attached PDF's are actual hardcopies.

Please confirm the scaling is now correct.

Kind regards
Keri

Dr Matthews,

The location and block plans are not scaling correctly as the floor plan and elevations are not scaling correctly.

It may be that photos of the plans have been provided even though they have been saved as .pdfs.

If you have the actual hard copies of the plans, this problem may be overcome by you scanning the plans as pdfs but at this point I can't confirm this will work.

I also notice that on WA/25/17/CLP, there were problems scaling the plans also.

If you have any questions, please let me know.

Thank you

Daun

Dr Matthews,

Thank you for the plans you have emailed.

The elevation plan needs to have a scale or measurements (length, height in metric) and to be labelled as existing and/or proposed. I also require the two side elevations of the garage with a scale or measurements. If there is no operational development on the side elevations, one plan labelled existing and proposed side elevations will suffice.

If you have any questions, please let me know.

Thank you
Daun

Dear Daun

Thank you for your reply and for the offer of an extension to our deadline.

My husband has now managed to convert the jpg files into PDF which are now attached below.

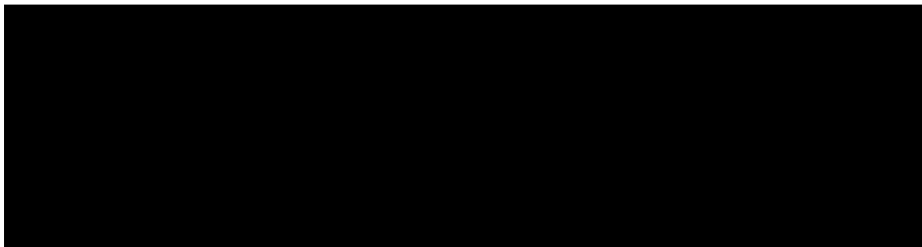

I hope this now completes all the information you need for our application above.

Please let me know if there is anything further that you need.

Yours sincerely

Clare Matthews
