Subject: OBJECTION to Planning Application WA/6/14/

Dear Mrs Gardner,

We are residents of Walberton Park which as you know is a Grade 11 listed building and are writing to express concern regarding this application.

We feel, that with the porch/entrance on the Walberton Park side of the proposed dwelling, cars will inevitably be parked there for convenience in spite of the new plan . We therefore object to the porch (new entrance) being on the Walberton Park side. The logical place to have the dwelling entrance is on the Walberton House side where the parking is allocated and where a door already exists in the building, thus keeping cars, bicycles, bins, etc out of view of people coming and going along the drive to and from Walberton Park.

The whole concept has been designed to have minimum impact on Walberton House (ie the applicant) at the cost of it's neighbours.

We suggest that this application is refused and that the applicant amends the plans to reflect the views, feelings and objections of the neighbours.

As we have been away for the past three weeks we knew nothing about this application until now. We understand the notice which was put up on the gate to Walberton House disappeared soon after it was put there ! Consequently people are not aware of it and I would hope that this will be taken into consideration and extra time given for comments to be forwarded to yourself.

Kindest regards.

Andrew and Janet Dobbie
