

Photograph 7:

The area of hardstanding outside the buildings and the storage containers.

**Photograph 8:**

Area of ruderal vegetation and tall grass outside the buildings.

**Photograph 9:**

Rubble pile adjacent to the ruderal vegetation and the buildings.

Photograph 10: The mound covered in ruderal vegetation adjacent to the buildings.

Photograph 11: Another mound opposite the buildings covered in ruderal vegetation.

Photograph 12: Holding area for the sheep and pony in the centre of the site.

**Photograph
13:** Area of
scrub near the
entrance of the
site.

**Photograph
14:** Log piles
within the
area of scrub.

**Photograph
15:** Log pile
covered in
earth and
vegetation
considered to
be a good
hibernacula.

Photograph 16: The northern and eastern boundary of the site as seen from area of scrub.	
Photograph 17: The northern tree line separating the site from neighbours' gardens.	
Photograph 18: The edge of the ancient woodland along the southern boundary of the site.	

Photograph

14: The gappy hedgerow and tree line along the southern boundary of the site.

**Photograph**

15: The northern hedgerow and tree line as seen from the northeast corner.

**Photograph**

16: A mature oak along the northern boundary with a hole in the trunk considered to have low roosting bat potential.

Photograph 17: The interior of the ancient woodland as seen from the edge of the site.

Photograph 18: A tree densely covered in ivy along the woodland edge considered to have low roosting bat potential.

Photograph 19: An oak along the eastern boundary of the site considered to have low roosting bat potential due to the presence of a hole in the trunk.

Photograph 20: The southern boundary of the site to the west of the ancient woodland.

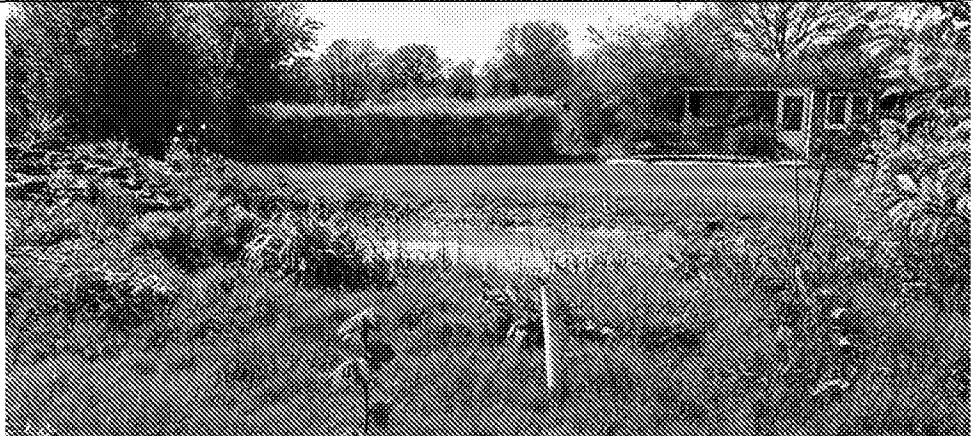

Photograph 21: The gappy hedgerow along the southern boundary of the site.

Photograph 22: The trees surrounding pond 3 in a neighbouring field.

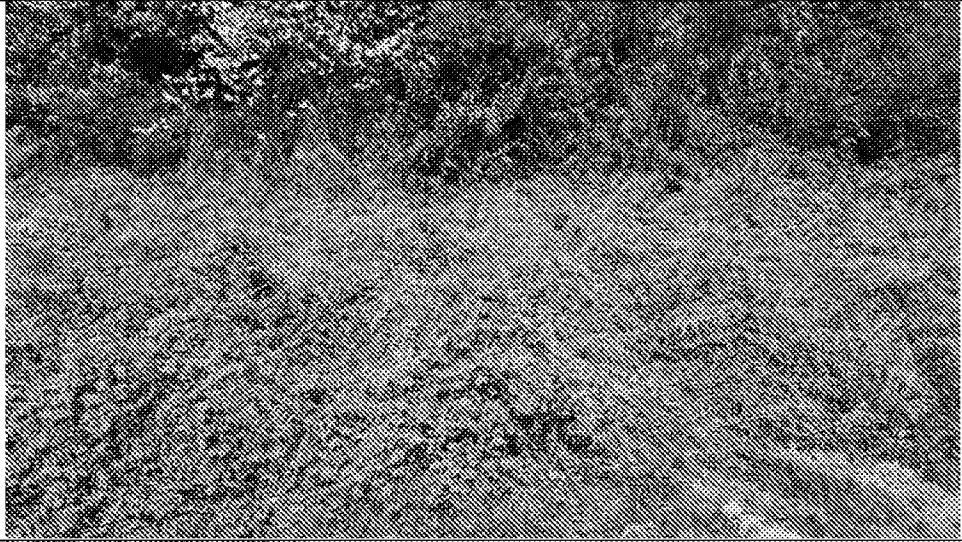

Photograph 23: Pond 1 as seen from the southwest boundary of the site.

Photograph

24: The area of bracken in the western corner of the site.

**Photograph**

25: The western boundary tree line looking towards the buildings on site.

**Photograph**

26: The western corner of the site as seen from the area of hardstanding.

Ecological Data Search SxBRC/16/877 - Summary Report

An ecological data search was carried out for land at Wandleys Farm, Fontwell on behalf of Natalie Kay (The Ecology Partnership) on 03/04/2017.

The following datasets were consulted for this report:

	Requested	Radius/buffer size
Designated sites, habitats & ownership maps	Yes	2km
Protected, designated and invasive species	Yes	2km

Summary of results

Sites and habitats

Statutory sites	1 National Park
Non-statutory sites	4 LWS / 3 Notable Road Verges
Section 41 habitats	6 habitats
Ancient and/or ghyll woodland	Present

Protected and designated species

International designations	34 species	363 records
National designations	104 species	1,274 records
Other designations	235 species	1,996 records
Total	252 species	2,123 records
Invasive non-native	21 species	94 records

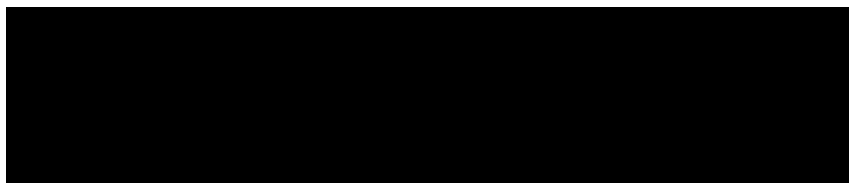

The report is compiled using data held by Sussex Biodiversity Record Centre (SxBRC) at the time of the request. SxBRC does not hold comprehensive species data for all areas. Even where data are held, a lack of records for a species in a defined geographical area does not necessarily mean that the species does not occur there – the area may simply not have been surveyed.

This summary page may be published.
The full report and maps may not be published or otherwise shared.

The data search report is valid until 03/04/2018 for the site named above.
