Subject: Michael Eastham ref WA/73/17OUT wandleys lane

We wish to post our objection to the proposed WELBECK PLANNING APPLICATION Wandleys Lane for the following reason

The application does not follow the Neighbourhood Plan or the Local Plan or the National Planning policy framework.ie

Increased strain on the local flood and sewerage risk to south, east and west.

Traffic increase in Local lanes such as West Walberton lane which has constant repair problems due exponential Increases in traffic already result in holes in road needing repairs

Strain on **infrastructure** such a schools and and doctor surgeries. It must be remembered the strain already experienced by reduction of funds on both doctors and schools. Teachers leaving secondary schools went into double figures over the summer holidays. Strains on class sizes increases. The existing communities suffer even more. Some schools are facing special measures.

It is impossible to get a prompt appointment at the doctors apart from emergencies. GPs are leaving already in their droves. NHS cuts will applied to an increasing population.

I support the parish councils submission wholeheartedly and without reservation.

John and Krys Swallow
