Subject: Objection to Planning Application WA/73/17OUT

I wish to strongly object to the Planning Application to build houses in the field at the Walberton end of Wandleys Lane. I totally support the objections raised by Walberton Parish Council, and have specific concerns that the housing will cause the field in our property and our neighbours property to flood. When we raised these concerns with the developers at their public meeting, they replied that the water runs off in the direction of Eastergate Lane, but every winter our field has a great deal of surface water, which comes from the field in question. With more concrete, roads, and roofs, there will be even more problem with surface water. We already have new housing planned along the Fontwell side of Wandleys Lane, and with the additional houses planned for Tupperts Field, and the Barnfield House area, narrow country roads such as Wandleys Lane and West Walberton Lane will be unable to cope with the additional traffic, making them unsafe for the dog walkers, horse riders, cyclists, and pedestrians who currently enjoy using these country roads. The local services are under a great deal of pressure already with the additional number of people in such a small area, many of the new houses being built are not yet sold, so I urge Arun Council to refuse this application. Thank you.

Mrs Wendy Ewer
