

Barncroft

Wandleys Lane

Eastergate

Chichester

PO20 3SE

09 March 2018

Re Amendment to – WA/73/17 OUT

I have already made a lengthy objection to this proposed development.

I do not think that any other improvement will make this a satisfactory option for development. I would like to make a further suggestion that somebody from Arun at least should make a personal visit to the area and take notes on the way the verges have been eroded due to traffic unable to pass on such a narrow lane. This should surely show how narrow the lane is. One thing this lane doesn't need is more cars. It is already used as a through road to Fontwell Ave from the A27. The 30mile speed sign has been knocked over. Very often the speed is excessive for such a lane and very unsafe for access traffic, walkers and cyclists.

I would also like to point out that in the past there was a conservation of frogs and toads group with caution signs on the lane. The sign for the frogs and toads has been removed- where have they gone? I suspect the frogs and toads are still along the lane and their habitat is still where it was - in the fields near to this site.

I would also point out that there are trees in that area with preservation orders on them.
