

Tree number 1

Silver Birch

Work – Fell

This tree is around 50 years old and over 15m in height with a spread of 11m and less than 8m from the house. I am advised that Silver Birch are short lived trees with shallow roots and that there is a risk to the house in future.

Given its size and age I propose to fell the tree.

Tree number 2

Bay

Work – Crown reduction of 2 metres

Age is unknown but must be older than 40 years. Height is over 10m and spread is up to 9m. The tree is showing some distress with small patches of random die back on the outer leaves and more die back within the tree canopy. It has become leggy and lost its dense look.

Proposed work is crown reduction by up to 2 metres and tidy the appearance.

Tree number 3

Magnolia

Work – Crown reduction of 2 metres upto

Age is unknown but must be older than 40 years. Height is 5m and the spread is upto 8m.

Proposed work is crown reduction by up to 2 metres and tidy the appearance.

Tree number 4

Rowen

Work – None, just included for information

Age probably around 35 years Height 5m with a spread of 4.5m
