

Biodiversity enhancement statement

Reference number PP-14688522

Applicant: Leo woodruff

Application site address: Abbeylands, west walberton lane, walberton, BN18 0QS

Description of site

Abbeylands is a detached Four bedroom house built in the early 1930s , north facing rear garden , managed lawn surrounding the house with a variety of shrubs , trees (non native and native)

Mitigation measures

As the proposed rear extension is replacing a existing conservatory/flat roof breakfast room(built in the 1980s) it will not be disrupting or removing any existing grass, plants, shrubs or trees.

A few plants planted close to the existing conservatory will be moved away from the construction area while work is being undertaken re-planted in existing flower beds

Proposed enhancements

1. **Nesting/roosting:** instillation of 2 x integrated bird bricks
2. **Planting:** additional planting around the new extension including lavender to encourage bees/other insects
3. A water butt will be installed to contribute towards watering
4. Bird tables/bird bath will be fed by rain water
5. Log piles will be constructed to create insect hotels
6. **Implementation & maintenance .**
The above enhancements will be installed within 6 months of construction.
