Subject: FW: WA/84/17/PL Fairmeads Farm, Binsted Lane, Arundel BN18 0LQ Planning Application

Dear Mr. Leal,

This is to object to the planning application WA/84/17/PL Demolition of existing structure & paddock & erection of farm building for the secure storage of farm machinery, fertilizer, hay & straw (resubmission following WA/63/16/PL).

Our neighbour Julia Plumstead has written to you detailing a number of reasons why this application should be rejected. Specifically, we agree with the concerns she raised about:

1. Grazing, Hay and Straw Production and Storage;
2. Storage of flammable materials;
3. Farm machine storage;
4. Pollution;
5. Our local ecology, which has been studied by qualified environmentalists in depth and their reports published.

Additional heavy traffic on Binsted Lane is of great concern to us because my husband is ill and sometimes requires emergency care. The site in question is just south of us at Meadow Lodge on

Binsted Lane -- between us and emergency vehicle access from the A27. In addition to the concerns that Ms. Plumstead stated, a contractual business that brings more heavy traffic onto Binsted Lane threatens to slow down, or possibly block access to our house. In the past, getting my husband to St Richard's Hospital in Chichester by ambulance in time has meant the difference between life and death. Delays cannot be tolerated.

Consequently, we strongly object to this planning application to erect a building to store farm machinery, fertilizer, hay and straw at Fairmeads Farm, Binsted Lane, Arundel BN18 0LQ.

Thank you for your consideration.

Maggie Moore Alexander and Christopher Alexander
