Subject: Re: Tree Works Invoice Ref: Myrtle Cottage

Hi Nigel

I can confirm the following works discussed reference following six trees.

T1 - Mature Hazel on the southerly rear garden boundary, overhanging the road. I recommend the tree is thinned out by approximately 15% to allow more light into the garden and the low limbs lifted over the summer house roof line.

The four trees along the north, rear garden boundary close to the buildings T2, Holly tree close up against the buildings and T3, a Bay tree next to the Holly. I recommend pruning the lateral spread and top growth on both trees, removing approximately 0.5 metres in spread and height. The next two trees along T4, a Magnolia and T5, a Maple both grow into each other, the Maple is also suppressing a young neighbouring birch tree. These trees has spread out over your garden and the neighbours to the north. I recommend the trees are pruned/thinned out by approximately 15% and the lower spreading limbs tipped back in places. Due to location of these above trees, the pruning works are recommended to maintain the trees and hopefully prevent them from out growing this confined space.

T6 - Mature Monterey Pine tree. My recommendation is to remove all major dead wood.

Thank you for getting me in to take a look at the above trees.

The above works excluding T6 will all require approval due to you being within the Walberton Conservation area.

Please do get back to me if there is anything more your wish to discuss.

Kind regards

John

Hi Nigel

Apologies! I can call in tomorrow between 5.30 & 6pm if that suits?

John
