Objection to Planning Application No WA/89/18/L for attention of Mr Zac Denton

From :
Anne Whitehouse
2 Walberton Park
BN18 0PJ

I object to the retrospective application WA/89/18/L for the so-called "privacy screen" on the terrace of No 9 Walberton Park which has now been in place for 9 months.

I live in Walberton Park which is a Grade II* listed building, and my apartment directly overlooks this fence which replaces a beautiful and appropriate hedge that previously provided privacy to the terrace and which is part of the landscaped communal gardens in which this historic regency manor house is set. (See photographs 7 & 8 submitted on the applicant's behalf). The applicant had this hedge removed himself thus removing his own privacy

The "screen" erected by the applicant is in fact an ugly, plasticized heavy metal fence, in lurid colours, and dominates the attractive gardens which are the setting for this graceful, classical colonnaded house. (see attached photographs),

The applicant claims that the fence is only temporary. We have already been subject to it for nine months and should not have to tolerate it for the years that it would take for newly planted shrubbery to conceal it. In any case its material and design are totally incompatible as an adjunct to a Grade II* listed building .

Photographs

Image 2 Taken from the lawn shows how tall and obtrusive this fence is.

.Image 4 Fence viewed from across the lawn

The last photograph is of the south facing front of historic Walberton Park house itself showing its striking classical portico and some of the delightful landscaped grounds in which it is set.
